

## *Guidelines to Upload Patient CSV Files*

### Hawaii Lab Reporting Portal

Updated on 10/12/2021

## 1. Overview

The document provides guidelines to upload CSV Files. All CSV files with patient data should have valid data (Acceptable Format/Values below) in mandatory fields. Data provided in the CSV file needs to conform to the standards in Acceptable Format/Values.

## 2. Upload CSV File

- The following are guidelines to upload CSV Files. All CSV files with patient data should have valid data (Acceptable Format/Values below) in **mandatory fields**. For optional fields, if data is provided in a CSV file, it needs to conform to the standards in Acceptable Format/Values. Any available data that is not mandatory, should still be filled in if the data is accessible and/or available. All fields need to be filled out as information presents itself.
- A lab can upload a maximum of 10 files per day. A CSV file can have up to 5,000 patient records.
- A CSV file should have Headers conforming to the CSV Template and Patient Data according to the format and values specified in this guide.
- A CSV file name must have no space, contain only letters, numbers, and underscore (\_), and cannot exceed 20 characters.
- Only Lab Manager role can upload CSV files.
